

题名	<a href="#">DESIGN STUDIES</a>
出版社	<a href="#">ELSEVIER SCI LTD, THE BOULEVARD, LANGFORD LANE, KIDLINGTON, OXFORD, ENGLAND, OXON, OX5 1GB</a>
期刊简介	<p><b>Description</b></p> <p><i>Design Studies</i> is the only journal to approach the understanding of design from comparisons across all domains of application, including engineering and product design, architectural design and planning, computer artefacts and systems design. It therefore provides a unique forum for the development and discussion of fundamental aspects of design activity and experience, from cognition and methodology to values and philosophy. The journal reports new research and scholarship in principles, procedures and techniques relevant to the practice, management and pedagogy of design..</p> <p>As the concept of design becomes increasingly important, it is vital for researchers, educators and practising designers to stay abreast of the latest research and new ideas in this rapidly growing field; with its truly interdisciplinary coverage, <i>Design Studies</i> meets these needs with maximum effect.</p> <p>The journal reports on new developments, techniques, knowledge and applications in the practice of design, as well as design education: how design techniques may be taught, the approach to ill-defined problems and the impact of new technologies. Coverage includes design management, design methods, participation in planning and design, design education, AI and computer aids in design, design in engineering, theoretical aspects of design, design in architecture, design and manufacturing, innovation in industry and design and society</p>
	<p><b>Types of Contribution</b></p> <p>Original research papers, reporting studies in the process of designing in all its many fields, or furthering the development and application of such new design knowledge. Papers should be written to be intelligible and pertinent to a wide range of readership across different design domains.</p> <p><b>Ethics in Publishing</b></p> <p>For information on Ethics in Publishing and Ethical guidelines for journal publication see ➡ <a href="http://www.elsevier.com/publishingethics">http://www.elsevier.com/publishingethics</a> and ➡ <a href="http://www.elsevier.com/ethicalguidelines">http://www.elsevier.com/ethicalguidelines</a>.</p>

## Conflict of interest

All authors are requested to disclose any actual or potential conflict of interest including any financial, personal or other relationships with other people or organizations within three years of beginning the submitted work that could inappropriately influence, or be perceived to influence, their work. See also ➡ <http://www.elsevier.com/conflictsofinterest>.

## Submission declaration

Submission of an article implies that the work described has not been published previously (except in the form of an abstract or as part of a published lecture or academic thesis), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere including electronically in the same form, in English or in any other language, without the written consent of the copyright-holder.

## Copyright

### 投稿须知

Upon acceptance of an article, authors will be asked to complete a 'Journal Publishing Agreement' (for more information on this and copyright see ➡ <http://www.elsevier.com/copyright>). Acceptance of the agreement will ensure the widest possible dissemination of information. An e-mail will be sent to the corresponding author confirming receipt of the manuscript together with a 'Journal Publishing Agreement' form or a link to the online version of this agreement.

Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions.

Permission of the Publisher is required for resale or distribution outside the institution and for all other derivative works, including compilations and translations (please consult ➡

<http://www.elsevier.com/permissions>). If excerpts from other copyrighted works are included, the author(s) must obtain written permission from the copyright owners and credit the source(s) in the article. Elsevier has preprinted forms for use by authors in these cases: please consult ➡ <http://www.elsevier.com/permissions>.

## Retained author rights

As an author you (or your employer or institution) retain certain rights; for details you are referred to: ➡ <http://www.elsevier.com/authorsrights>.

## **Role of the funding source**

You are requested to identify who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the paper for publication. If the funding source(s) had no such involvement then this should be stated. Please see ➡ <http://www.elsevier.com/funding>.

## **Funding body agreements and policies**

Elsevier has established agreements and developed policies to allow authors whose articles appear in journals published by Elsevier, to comply with potential manuscript archiving requirements as specified as conditions of their grant awards. To learn more about existing agreements and policies please visit ➡ <http://www.elsevier.com/fundingbodies>.

## **Language and language services**

Please write your text in good English (American or British usage is accepted, but not a mixture of these). Authors who require information about language editing and copyediting services pre- and post-submission please visit ➡ <http://www.elsevier.com/languageediting> or our customer support site at <http://epsupport.elsevier.com> for more information.

## **Submission**

Submission to this journal proceeds totally online. Use the following guidelines to prepare your article. Via the homepage of this journal (➡ <http://www.ees.elsevier.com/destud>) you will be guided stepwise through the creation and uploading of the various files. The system automatically converts source files to a single Adobe Acrobat PDF version of the article, which is used in the peer-review process. Please note that even though manuscript source files are converted to PDF at submission for the review process, these source files are needed for further processing after acceptance. All correspondence, including notification of the Editor's decision and requests for revision, takes place by e-mail and via the author's homepage, removing the need for a hard-copy paper trail.

Submissions to this journal should normally be within the range 3000-6000 words plus illustrations.

## Peer Review Policy:

All articles submitted to Design Studies are subject to peer review. For more information about how the process is conducted for this journal, please take a look at the peer review policy statement [here](#). Submitted papers may be accepted without changes or subject to amendment and re-refereeing before publication. Papers may be rejected on the grounds of relevance or content.

## Language

Please write your text in good English (British usage is preferred, and American is accepted, but not a mixture of these). Use decimal points (not decimal commas); use a space for thousands (10 000 and above).

## Subdivision

The main text must start with an introductory section which is neither titled nor numbered, and followed by further sections which are titled and numbered from 1, and subtitled and numbered from 1.1, etc. Consult a recent issue of the journal to become familiar with style, layout and conventions

## Essential Title Page Information

*Title.* Concise and informative. Titles are often used in information-retrieval systems. Avoid abbreviations and formulae.

*Author names and affiliations.* Where the family name may be ambiguous (e.g., a double name), please indicate this clearly. Present the authors' affiliation addresses (where the actual work was done) below their names, separating the name(s) plus affiliation(s) where necessary. Provide the full postal address of each affiliation, including the country name.

*Corresponding author.* Clearly indicate who is willing to handle correspondence at all stages of refereeing and publication, also post-publication. **Ensure that telephone and fax numbers (with country and area code) are provided in addition to the e-mail address and the complete postal address.**

*Present/permanent address.* If an author has moved since the work described in the article was done, or was visiting at the time, a "Present address" (or "Permanent address") may be indicated as a footnote to

that author's name. The address at which the author actually did the work must be retained as the main, affiliation address. Superscript Arabic numerals are used for such footnotes.

*Abstract and Keywords.* Include the abstract and keywords on the title page with authors' names.

### **Abstract**

A self contained abstract (up to 120 words), outlining in a single paragraph the aims, scope and conclusions of the paper must be supplied.

### **Graphical abstract**

A Graphical abstract is optional and should summarize the contents of the paper in a concise, pictorial form designed to capture the attention of a wide readership online. Authors must provide images that clearly represent the work described in the paper. Graphical abstracts should be submitted as a separate file in the online submission system. Maximum image size: 400 × 600 pixels (h × w, recommended size 200 × 500 pixels). Preferred file types: TIFF, EPS, PDF or MS Office files. See  <http://www.elsevier.com/graphicalabstracts> for examples.

### **Research highlights**

Research highlights are a short collection of bullet points that convey the core findings of the article. Research highlights are optional and should be submitted in a separate file in the online submission system. Please use 'Research highlights' in the file name and include 3 to 5 bullet points (maximum 85 characters per bullet point including spaces). See  <http://www.elsevier.com/researchhighlights> for examples.

### **Keywords**

Choose up to 5 keywords for your paper selected from the journal's set list, available [here](#).. You may include one keyword of your own choice not on the list.

### **Units**

Follow internationally accepted rules and conventions: use the international system of units (SI). If other quantities are mentioned, give their equivalent in SI.

### **Artwork**

## ***Electronic artwork***

### *General points*

- Make sure you use uniform lettering and sizing of your original artwork.
- Save text in illustrations as "graphics" or enclose the font.
- Only use the following fonts in your illustrations: Arial, Courier, Times, Symbol.
- Number the illustrations according to their sequence in the text.
- Use a logical naming convention for your artwork files.
- Provide captions to illustrations separately.
- Produce images near to the desired size of the printed version.
- Submit each figure as a separate file.

A detailed guide on electronic artwork is available on our website:

➡ <http://www.elsevier.com/artworkinstructions>

**You are urged to visit this site; some excerpts from the detailed information are given here.**

### *Formats*

Regardless of the application used, when your electronic artwork is finalised, please "save as" or convert the images to one of the following formats (note the resolution requirements for line drawings, halftones, and line/halftone combinations given below):

EPS: Vector drawings. Embed the font or save the text as "graphics".

TIFF: color or grayscale photographs (halftones): always use a minimum of 300 dpi.

TIFF: Bitmapped line drawings: use a minimum of 1000 dpi.

TIFF: Combinations bitmapped line/half-tone (color or grayscale): a minimum of 500 dpi is required.

DOC, XLS or PPT: If your electronic artwork is created in any of these Microsoft Office applications please supply "as is".

### **Please do not:**

- Supply embedded graphics in your wordprocessor (spreadsheet, presentation) document;
- Supply files that are optimised for screen use (like GIF, BMP, PICT, WPG); the resolution is too low;
- Supply files that are too low in resolution;
- Submit graphics that are disproportionately large for the content.

## ***Color artwork***

Please make sure that artwork files are in an acceptable format (TIFF, EPS or MS Office files) and with the correct resolution. If, together with your accepted article, you submit usable color figures then Elsevier will ensure, at no additional charge, that these figures will appear in color on the Web (e.g., ScienceDirect and other sites) regardless of whether or not these illustrations are reproduced in color

in the printed version. **For color reproduction in print, you will receive information regarding the costs from Elsevier after receipt of your accepted article.** Please indicate your preference for color in print or on the Web only. For further information on the preparation of electronic artwork, please see 

<http://www.elsevier.com/artworkinstructions>.

Please note: Because of technical complications which can arise by converting color figures to "gray scale" (for the printed version should you not opt for color in print) please submit in addition usable black and white versions of all the color illustrations.

## Tables

Number tables consecutively in accordance with their appearance in the text. Place footnotes to tables below the table body and indicate them with superscript lowercase letters. Avoid vertical rules. Be sparing in the use of tables and ensure that the data presented in tables do not duplicate results described elsewhere in the article.

## References

### *Reference style*

*Text:* Indicate references within the text using the author/date referencing style recommended by the American Psychological Association (see below), e.g. where author's name appears within the text, "As Thomas and Carroll (1979: p 7) suggest ", or all in parentheses where authors' names are not cited specifically in text, e.g. "As some authors suggest (Jones, 1984; Cross, 2006) ". Be specific: do not give long lists of vaguely relevant sources. Where directly quoting from a source, or referring to a specific topic within a source, give the page number(s). List all references at the end of the text, following the citation style recommended by the American Psychological Association. You are referred to the Publication Manual of the American Psychological Association, Sixth Edition, ISBN 1-4388-0559-6, copies of which may be ordered from <http://books.apa.org/books.cfm?id=4200067> or APA Order Dept., P.O.B. 2710, Hyattsville, MD 20784, USA or APA, 3 Henrietta Street, London, WC3E 8LU, UK. Details concerning this referencing style can also be found at <http://linguistics.byu.edu/faculty/henrichsen1/apa/apa01.html>. Avoid the use of footnotes; where really unavoidable, collect together in a Notes section at the end of the manuscript, before the list of References.

*List:* references should be arranged first alphabetically and then further

sorted chronologically if necessary. More than one reference from the same author(s) in the same year must be identified by the letters "a", "b", "c", etc., placed after the year of publication.

*Examples:*

*Reference to a journal publication:*

Thomas, J. C., & Carroll, J. M. (1979). The psychological study of design. *Design Studies* 1, 5-11.

*Reference to a book:*

Cross, N. (2006). *Designerly Ways of Knowing*. London: Springer.

*Reference to a chapter in an edited book:* Jones, J. C. (1984). A method of systematic design. In N. Cross (Ed.), *Developments in Design Methodology* (pp. 9-31). Chichester: John Wiley & Sons.

### **Video data**

Elsevier accepts video material and animation sequences to support and enhance your scientific research. Authors who have video or animation files that they wish to submit with their article are strongly encouraged to include these within the body of the article. This can be done in the same way as a figure or table by referring to the video or animation content and noting in the body text where it should be placed. All submitted files should be properly labeled so that they directly relate to the video file's content. In order to ensure that your video or animation material is directly usable, please provide the files in one of our recommended file formats with a maximum size of 10 MB. Video and animation files supplied will be published online in the electronic version of your article in Elsevier Web products, including ScienceDirect: ➡ <http://www.sciencedirect.com>. Please supply 'stills' with your files: you can choose any frame from the video or animation or make a separate image. These will be used instead of standard icons and will personalize the link to your video data. For more detailed instructions please visit our video instruction pages at ➡ <http://www.elsevier.com/artworkinstructions>. Note: since video and animation cannot be embedded in the print version of the journal, please provide text for both the electronic and the print version for the portions of the article that refer to this content.

### **Supplementary data**

Elsevier accepts electronic supplementary material to support and

enhance your scientific research. Supplementary files offer the author additional possibilities to publish supporting applications, high-resolution images, background datasets, sound clips and more. Supplementary files supplied will be published online alongside the electronic version of your article in Elsevier Web products, including ScienceDirect: ➡ <http://www.sciencedirect.com>. In order to ensure that your submitted material is directly usable, please provide the data in one of our recommended file formats. Authors should submit the material in electronic format together with the article and supply a concise and descriptive caption for each file. For more detailed instructions please visit our artwork instruction pages at ➡ <http://www.elsevier.com/artworkinstructions>.

### Submission Checklist

It is hoped that this list will be useful during the final checking of an article prior to sending it to the journal's Editor for review. Please consult this Guide for Authors for further details of any item. Ensure that the following items are present:

- One Author designated as corresponding Author: • E-mail address
- Full postal address
- Telephone and fax numbers

All necessary files have been uploaded:

- Abstract
- Keywords
- Title page with authors' names
- Manuscript without authors' names
- All figures and captions
- All tables (including title, description, footnotes)

Further considerations:

- Manuscript has been "spellchecked" and "grammar-checked"
- References are in the correct format for this journal
- All references mentioned in the Reference list are cited in the text, and vice versa
- Permission has been obtained for use of copyrighted material from other sources (including the Web)
- color figures are clearly marked as being intended for color reproduction on the Web (free of charge) and in print or to be reproduced in color on the Web (free of charge) and in black-and-white in print
- If only color on the Web is required, black and white versions of the figures are also supplied for printing purposes

For any further information please visit our customer support site at <http://epsupport.elsevier.com>.

## Use of the Digital Object Identifier

The Digital Object Identifier (DOI) may be used to cite and link to electronic documents. The DOI consists of a unique alpha-numeric character string which is assigned to a document by the publisher upon the initial electronic publication. The assigned DOI never changes. Therefore, it is an ideal medium for citing a document, particularly 'Articles in press' because they have not yet received their full bibliographic information. The correct format for citing a DOI is shown as follows (example taken from a document in the journal *Physics Letters B*):

doi:10.1016/j.physletb.2003.10.071

When you use the DOI to create URL hyperlinks to documents on the web, they are guaranteed never to change.

## Proofs

One set of page proofs (as PDF files) will be sent by e-mail to the corresponding author (if we do not have an e-mail address then paper proofs will be sent by post) or, a link will be provided in the e-mail so that authors can download the files themselves. Elsevier now provides authors with PDF proofs which can be annotated; for this you will need to download Adobe Reader version 7 (or higher) available free from <http://www.adobe.com/products/acrobat/readstep2.html>. Instructions on how to annotate PDF files will accompany the proofs (also given online). The exact system requirements are given at the Adobe site: <http://www.adobe.com/products/acrobat/acrrsystemreqs.html#70win>. If you do not wish to use the PDF annotations function, you may list the corrections (including replies to the Query Form) and return them to Elsevier in an e-mail. Please list your corrections quoting line number. If, for any reason, this is not possible, then mark the corrections and any other comments (including replies to the Query Form) on a printout of your proof and return by fax, or scan the pages and e-mail, or by post. Please use this proof only for checking the typesetting, editing, completeness and correctness of the text, tables and figures. Significant changes to the article as accepted for publication will only be considered at this stage with permission from the Editor. We will do everything possible to get your article published quickly and accurately. Therefore, it is important to ensure that all of your corrections are sent back to us in one communication: please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. Proofreading is solely your responsibility. Note that Elsevier may proceed with the publication of your article if no response is received.

## Offprints

The corresponding author, at no cost, will be provided with a PDF file of the article via e-mail. For an extra charge, paper offprints can be ordered via the offprint order form which is sent once the article is accepted for publication. The PDF file is a watermarked version of the published article and includes a cover sheet with the journal cover image and a disclaimer outlining the terms and conditions of use.

For inquiries relating to the submission of articles (including electronic submission where available) please visit this journal's homepage. You can track accepted articles at <http://www.elsevier.com/trackarticle> and set up e-mail alerts to inform you of when an article's status has changed. Also accessible from here is information on copyright, frequently asked questions and more. Contact details for questions arising after acceptance of an article, especially those relating to proofs, will be provided by the publisher.
