| 题名   | <a href="#"><u>JOURNAL OF GEOTECHNICAL AND GEOENVIRONMENTAL ENGINEERING</u></a>   |
| 出版社  | <a href="#"><u>ASCE-AMER SOC CIVIL ENGINEERS, 1801 ALEXANDER BELL DR, RESTON, USA, VA, 20191-4400</u></a>   |
| 期刊简介 | <p>The Journal of Geotechnical and Geoenvironmental Engineering covers the broad area of practice known as geotechnical engineering. Papers are welcomed on areas such as foundations, retaining structures, soil dynamics, engineering behavior of soil and rock, site characterization, slope stability, dams, rock engineering, earthquake engineering, environmental geotechnics, geosynthetics, computer modeling, groundwater monitoring and restoration, and coastal and geotechnical ocean engineering. Authors are also encouraged to submit papers on new and emerging topics within the general discipline of geotechnical engineering. Theoretical papers are welcomed, but there should be a clear and significant potential for practical application of the theory. Practice-oriented papers and case studies are particularly welcomed and encouraged.</p> <p>1/4I3D;¶Journal of the Geotechnical Engineering Division;·ISSN: 0733-9410</p>  |
|      | <p>Submit five (5) double-spaced copies of papers and notes or four (4) copies of discussions to the Journals Department along with a completed <a href="#"><u>ASCE Sizing Guide</u></a>. Check manuscript length limitations listed below. Papers under review, accepted for publication, or published elsewhere are not accepted. Write, phone or email the Journals Department for <i>ASCE Authors Guide to Journals, Books, and Reference Publications</i> for complete instructions for manuscript preparation. You can access the <a href="#"><u>ASCE Authors;~ Guide to Journals, Books, and Reference Publications</u></a> on the Publications Web site. It is also available in printed form and can be obtained by writing or phoning the Journals Department at ASCE, 1801 Alexander Bell Drive, Reston, Virginia, 20191-4400; 1-703-295-6290.</p> <p style="text-align: center;"><b>Length Requirements</b></p>   |

投稿须知

For most ASCE journals, the maximum number of words or word-equivalents is 10,000 for papers, 3,500 for notes, and 2,000 for discussions. The editor may waive these restrictions to encourage papers on topics that cannot be treated within these limitations. Such topics may include state-of-the-art reviews and detailed case histories. However, authors are advised that most topics can be covered within these limitations, and that the editors of this journal require clear justification for longer manuscripts. Please use the [ASCE Sizing Guide](#) to determine the length and include a copy of the form with your submission.

### SI Units

The use of System International (SI) units as primary units of measure is mandatory. Other units may be given in parenthesis after the SI unit if the author desires. More information about SI units can be found in the [ASCE Author Guide](#) or from [NIST](#).

### CE Database subject headings

The subject headings are assigned by the manager of the Civil Engineering Database ([www.pubs.asce.org](http://www.pubs.asce.org)) using a thesaurus also available on the ASCE website. New subject headings are added to the thesaurus as warranted. We welcome the inclusion of subject headings with your final manuscript; however, the subject headings you provide should be chosen from the list on the website.

### Reprints

Authors can order reprints using reprint order forms provided by the Production Department or on the internet at <http://www.pubs.asce.org/authors/jrnreprint.pdf>.
