文献在科研中的重要地位

- 文献浩瀚如云海，但精彩的并不多。除了要一览众山小，还要从众多文献中，遴选出有代表性文献重点学习（Web of Science? CNKI? 维普? 万方?）：
 - 1、了解科研发展最新动态、发展方向。对某一学科，自己关心的某个问题存着疑惑，查找问题的历史源头，需要求解、需要解决问题的方法，需要对机制的理解。
 - 2、看前人是如何认识问题并阐述问题，是逐步递进演绎还是以实证来说话；
 - 3、从文献中要学习如何将一个概念、原理、方法应用到一个实际案例，或通过修改、修订，加入新东西，拓展延伸到其它领域中，发现看待一个问题的不同视角和观点；找到所研究问题的精彩之处以及缺失之处，则可高屋建瓴。
 - 4、从相关的文献中，获得灵感和启发，立足于自身的理论和实验，开始自己的兴趣研究，谋求突破口和创新出发点，获得创新源头。并不断和以前文献的结果相验证，和预期结果相验证，提出自己的认识机制，形成自己的文章与课题申请撰写。
 - 5、提高自己研究成果的国际影响力，获得国际同行的认可，展开国际合作最为重要的展示平台。

我校高分子学科2010年SCI论文数量位居世界第一

时间: 2012-06-01 17:34 阅读 2478次

来源: 科学技术发展研究院 责编: 付玉杰

据国家自然科学基金委员会近日出版的《化学十年：中国与世界》学科发展态势评估报告显示，四川大学高分子学科2010年SCI论文发表总数为244篇，在全球高校和科研机构中排名第一，SCI论文引用也位居世界前列。

我校高分子学科是国内成立最早的学科之一，经过学校全体高分子人多年的共同努力，现拥有1个国家重点实验室和2个省部级重点实验室，所属学科为国家级重点学科，拥有学士、硕士和博士授予权和博士后流动站，形成了以院士、长江学者和杰青为学术带头人的研究队伍，2011年获得国家基金委创新研究群体。每年招收和培养400余名本科生和300余名硕博研究生，近年年均科研经费近8000万元，SCI论文超过200篇。

从SCI论文发表数量和引用情况，以及我校高分子学科的研究队伍、人才培养和研究成果，表明我校已成为世界最重要的高分子教学研究基地和中心之一。

基于Web of Science的诺贝尔奖预测

- 2013年诺贝尔奖已揭晓，其中8位曾被汤森路透基于引文分析预测；
- 引文数据蕴藏全球科学家的群体判断，并反映科研延续性和知识传承；
- 今年6月汤森路透发布《2012年最热门的研究人员和科学论文》里，21位最热门研究人员有4位来自中国。诺贝尔奖距离中国已经不远。
- 中国论文已经在从“量”到“质”的演变，中国论文“质”的飞升，已获世界学术界公认，并非目前公众媒体的普遍相反的认知。

- Web of Science核心合集内容覆盖：
- 22,000+ 期刊，3,100百万件专利，6万个会议录，5,500 专业网站，5,000本学术专著，2百万化学结构
- 提供：
- 一个世纪的科学发展 - 100 年的科学引文

- Web of Science平台服务于：
- 2千万使用者，81个国家
- 超过3,000家用户
- 每天15万使用者

摘要: Field equations of the non-local elasticity are solved to determine the state of stress in a plate with a Griffith crack subject to the anti-plane shear. Then a set of dual-integral equations is solved using Schmidt's method. Contrary to the classical elasticity solution, it is found that the fracture criteria are unified at the crack tip. The results are reserved.

时间跨度

检索规则：常用的布尔逻辑检索运算符

名称	符号	说明	举例
逻辑运算符	and	连接限定词，缩小检索。系统默认为and	Information and retrieval
	or	连接同义词，扩大检索	Internet or www or web
	not	排除	Energy not nuclear
截词符	*	右截词，利用它可以只输入检索词的起始部分，而实现一簇词的检索。	patent* 命中 patent, patents, patentable, patented 等
	?	有限截词。问号个数代表字符数。	wom?n 命中 woman, women, fib?? 命中 fiber, fibre.
位置算符	same	所连接的两词必须在同一字段或同一句话中。	Ad=(tsing* same beijing)
词组检索	""	实现词组检索，即词间不能插词，词序不能改变。只能用于主题检索字段。若两词之间是用连词符、逗号等连接时，系统将按词组检索。	<ul style="list-style-type: none">● "energy conservation"● waste-water 将命中包含 waste-water 和词组 waste water 的记录。
备注	系统不区分大小写。当两个检索词之间无算符连接时，系统默认为逻辑与检索。

Abstract: we employ a gravity framework to evaluate the importance of transport infrastructure in determining the tourism attractiveness of destinations. The analysis is based on a panel data set of bilateral tourism flows among 28 countries over the decade 1990-2000. We find that, on top of tourism infrastructure and other classical determinants, transport infrastructure is a significant determinant of tourism inflows into a destination. Disaggregated continent-wise analysis reveals that the sensitiveness of tourism flows to transport infrastructure does vary, depending on origins and destinations. We also find evidence of repeated tourism around the world, the more so from high-income origins and to high-income destinations. (c) 2007 Elsevier Ltd. All rights reserved.

Description

Tourism Management is the leading international journal for all those concerned with the planning and management of travel and tourism.

Tourism comprises a multitude of activities which together form one of the world's fastest growing international sectors. The journal takes an interdisciplinary approach and includes planning and policy aspects of international, national and regional tourism as well as specific management studies.

The journal's contents reflect its integrative approach - including primary research articles, discussion of current issues, case studies, reports, book reviews and listings of recent publications, and forthcoming meetings. Articles are relevant to both academics and practitioners, and are the results of anonymous reviews by at least two referees chosen by the editor for their specialist knowledge.

TOURISM MANAGEMENT

Research, Policies, Practice

Guide for Authors

Tourism Management is an international journal which publishes original research in tourism, analysis of current trends, and information on the planning and management of all aspects of travel and tourism.

The journal emphasizes the broadness and interrelatedness of the tourism industry. Articles, which should take a multisectoral approach, may cover geography, economics, transportation, hotels and catering, sociology, marketing or development studies.

Tourism Management aims to publish articles that are directly relevant to its readers and of interest to both academics and practitioners, with a minimum of technical jargon. Subjects covered should be treated in such a way as to appeal to as wide a range as possible, and those reporting research should attempt to draw management implications from their results. The use of examples is encouraged.

Submission of Papers

From 1st October 2005, all manuscripts should be submitted electronically through the Elsevier Editorial System (EES) which can be accessed at <http://ees.elsevier.com/jtma>. The system will automatically convert your source files (which should preferably be in an editable format such as word) to a single Adobe Acrobat PDF version of the article, which will be used during the peer-review process. Please note that even though manuscript source files are converted to PDF at submission for the review process, these source files will be needed for further processing after acceptance. If you are not able to submit your paper to JTMA electronically please contact the Editor Chris Ryan at caryan@waikato.ac.nz for further instructions.

Submission of an article implies that the work described has not been published previously (except in the form of an abstract or as part of a published lecture or academic thesis), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, without the written consent of the Publisher. The Editors reserve the right to edit or otherwise alter all contributions, but authors will receive proofs for approval before publication.

Preparation of text

Please write your text in good English (American or British usage is accepted, but not a mixture of these). Italics are not to be used for expressions of Latin origin, for example, *in vivo*, *et al.*, *per se*. Use decimal points (not commas); use a space for thousands (10 000 and above).

Double spacing and wide (3 cm) margins should be used. (Avoid full justification, i.e., do not use a constant right-hand margin.) Ensure that each new paragraph is clearly indicated.

Provide the following data on the title page (in the order given).

Title. Concise and informative. Titles are often used in information-retrieval systems. Avoid abbreviations and formulae where possible.

Author names and affiliations. Where the family name may be ambiguous (e.g., a double name), please indicate this clearly. Present the authors' affiliation addresses (where the actual work was done) below the names. Indicate all affiliations with a lower-case superscript letter immediately after the author's name and in front of the appropriate address. Provide the full postal address of each affiliation, including the country name, and, if available, the e-mail address of each author.

Corresponding author. Clearly indicate who is willing to handle correspondence at all stages of refereeing and publication, also post-publication. Ensure that telephone and fax numbers (with country and area code) are provided in addition to the e-mail address and the complete postal address.

Present/permanent address. If an author has moved since the work described in the article was done, or was visiting at the time, a 'Present address' (or 'Permanent address') may be indicated as a footnote to that author's name. The address at which the author actually did the work must be retained as the main, affiliation address. Superscript Arabic numerals are used for such footnotes.

Abstract. A concise and factual statement of the objectives, methods, results and conclusions.

Keywords. Immediately after the abstract, provide a maximum of 8 keywords, avoiding general and plural terms and multiple concepts (avoid, for example, 'and', 'of'). Be sparing with abbreviations: only abbreviations firmly established in the field may be eligible.

reference to the reference list.

Arrangement of the article

Subdivision of the article. Divide your article into clearly defined and numbered sections. Subsections should be numbered 1.1 (then 1.1.1, 1.1.2), 1.2, etc. (the abstract is not included in section numbering). Use this numbering also for internal cross-referencing: do not just refer to 'the text.' Any subsection, ideally, should not be more than 600 words. Authors are urged to write as concisely as possible, but not at the expense of clarity.

Figure legends, figures, schemes. Present these, in this order, at the end of the article. They are described in more detail below. High-resolution graphics files must always be provided separate from the main text file (see Preparation of illustrations). Tables. Number tables consecutively in accordance with their appearance in the text. Place footnotes to tables below the table body and indicate them with superscript lowercase letters. Avoid vertical rules. Be sparing in the use of tables and ensure that the data presented in tables do not duplicate results described elsewhere in the article.

References

Responsibility for the accuracy of bibliographic citations lies entirely with the authors.

Citations in the text: Please ensure that every reference cited in the text is also present in the reference list (and vice versa). Any references cited in the abstract must be given in full. Unpublished results and personal communications should not be in the reference list, but may be mentioned in the text. Citation of a reference as 'in press' implies that the item has been accepted for publication.

Citing and listing of web references: As a minimum, the full URL should be given. Any further information, if known (author names, dates, reference to a source publication, etc.), should also be given. Web references can be listed separately (e.g., after the reference list) under a different heading if desired, or can be included in the reference list.

Text: Citations in the text should follow the referencing style used by the American Psychological Association. You are referred to the Publication Manual of the American Psychological Association, Fifth Edition, ISBN 1-55798-790-4, copies of which may be ordered from <http://www.apa.org/books/4200061.html> or APA Order Dept., P.O.B. 2710, Hyattsville, MD 20784, USA or APA, 3 Henrietta Street, London, WC3E 8LU, UK. Details concerning this referencing style can also be found at <http://humanities.bvu.edu/linguistics/Henrichsen/APA/APA01.html>.

List: References should be arranged first alphabetically and then further sorted chronologically if necessary. More than one reference from the same author(s) in the same year must be identified by the letters "a", "b", "c", etc., placed after the year of publication.

Examples:

Reference to a journal publication:

Van der Geer, J., Hanraads, J. A. J., & Lupton R. A. (2000). The art of writing a scientific article. *Journal of Scientific Communications*, 163, 51-59.

Reference to a book:

Strunk, W., Jr., & White, E. B. (1979). *The elements of style*. (3rd ed.). New York: Macmillan, (Chapter 4).

Reference to a chapter in an edited book:

Mettam, G. R., & Adams, L. B. (1994). How to prepare an electronic version of your article. In B. S. Jones, & R. Z. Smith (Eds.), *Introduction to the electronic age* (pp. 281-304). New York: E-Publishing Inc.

Preparation of Artwork

Number figures consecutively with Arabic numerals. A detailed guide on electronic artwork is available on our website: <http://www.elsevier.com/artworkinstructions>.

When uploading your files, please do not use PDFs as source files for illustrations as these are large and slow down the journal site, which inconveniences users. Please use standard drawing programs for line figures (e.g., Adobe etc.). Please save all illustrations, including scanned photographs, micrographs and plates, in a simple file format such as Jpeg. The site will build all of your source files into a PDF. Please also remember to approve the PDF promptly.

Color figures in the printed issue can be accepted only if the authors defray the full cost. However, if together with your accepted article, you submit usable color figures, then Elsevier will ensure, at no additional charge, that these figures will appear in color on the Web (e.g., ScienceDirect and other sites) regardless of whether these illustrations are reproduced in color in the printed version.

- 发现相关SSCI、A&HCI相关学术文献总数达到1870篇，其中最早相关文献出现在1960年，且在1995年以后论文数量开始急剧增长，尤其是在2012年达到最高值193篇，说明残疾人旅游的相关学术研究在西方快速发展于九十年代后期，相关论文每年出版的文献数如图：

- 在文献学科分布方面，涉及与残疾人健康密切相关的康复学（Rehabilitation）的文献数量最多，达到636篇，占总数的34.16%，其次是涉及临床神经病学、特殊教育、公共环境职业健康、运动科学、精神病学、休闲运动旅游等方面的研究，具体分布情况如表所示：

学科类别	文献数量	所占比例 (%)
康复学 (Rehabilitation)	636	34.16
临床神经病学 (Clinical Neurology)	207	11.12
特殊教育 (Education Special)	171	9.18
公共环境职业健康 (Public Environmental Occupational Health)	165	8.86
运动科学 (Sport Sciences)	133	7.14
精神病学 (Psychiatry)	125	6.71
休闲运动旅游 (Hospitality Leisure Sport Tourism)	91	4.89
其他 (Others)	334	17.94

- 通过对相关论文作者所属国家/地区的分析发现，美国学者发表了731篇，占总数的39.26%，其次是英格兰、加拿大和澳大利亚，分别占11.06%、10.80%、7.20%的比例，该分析结果表明美国学者在这一领域的研究中占有绝对的主导地位。

- 对被引频次较高文献和来自权威期刊文献的梳理、研读，发现其研究热点主要集中在以下几个方面：
 - 残疾人旅游需求与动机
 - 残疾人旅游态度和行为
 - 残疾人旅游障碍
 - 残疾人旅游产品与营销

关于残疾人旅游需求的国际研究分析

关于残疾人旅游需求方面的研究，大部分学者指出，残疾人与正常人有着同样的旅游需求（Woodside& Etzel^[10]，1980；Smith^[11]，1987；Darcy& Daruwalla^[12]，1999；Foggin^[13]，2001）。Turco 等学者^[14]（1998）在专门研究了残疾人旅游障碍的文章中有涉及到，他们通过调查发现，残疾旅游者在旅游活动中更想表达他们的需求意愿，着重强调对设备设施和位置的可进入性、降低旅游景区的门票费用、可信赖的旅游信息、交通的灵活性和有效的制度政策的需求。而后 Burnett 和 Baker^[6]（2001）通过调查发现重度残疾游客更倾向于安静而又和平的乡村目的地。Yau 等^[15]（2004）认为残疾人外出旅游并不仅仅为了休闲，还为了能够学会照顾自己；残疾旅游者强调对把家人或朋友作为旅伴的需求，不只是基于对帮助的需求，而是一种为了与家人朋友分享旅行经历的需求，这种活动的实质就是“欢乐”和“休闲”；这种需求跟正常人没有什么不同。Daniels 等学者^[16]（2005）研究了残疾人的愉快旅游体验，通过相关研究综述发现学术界关于残疾人旅游需求的研究仍处于初期阶段，并指出残疾人在旅游决策中对旅游信息的搜集渠道和传播手段的需求更趋多样化，同时还发现肢残旅游者和正常旅游者在很大程度上有着极其类似的旅游体验需求。

关于残疾人旅游动机的国际研究分析

关于残疾人旅游动机方面的研究，Ray 和 Ryder^[17]（2003）将残疾旅游者的动机分为自然性和社会性两大类，其中自然性旅游动机主要表现为对自然风景和野生动植物摄影很感兴趣，希望更多地了解大自然，尤其是山川、河流、小溪；社会性旅游动机主要表现为对关爱的需求，包括与家人的团聚、对亲戚朋友的拜访，用自己的方式去感受自由和体验其他生活方式，也想参观博物馆和美术馆，追求知识和艺术。Shaw 和 Coles^[18]（2004）通过试点调研发现残疾人外出度假的动机在于放松身心、缓解压力、休息、感受自由和获得参观不同地点的新鲜经历，但这和正常人的度假动机完全不同，对于残疾游客来说，外出度假可以使其照顾者有时间脱离他们的照顾责任，给自身留出一定的空间。

基于Web of Science数据分析后的 研究小结

- 国外关于残疾人旅游活动的相关学术研究起步比较早，自20世纪80年代开始，发展至今已形成较为系统的研究理论，研究的切入点不断深入；
- 研究方法综合多样，比较注重实证研究与案例分析，以及定量分析与定性分析相结合；
- 从具体研究内容看，越来越细，更侧重于从残疾人自身视角，即针对残疾人群体的旅游需求动机及影响因素、出游障碍、旅游行为等方面，在此基础上对残疾人旅游市场的进行细分和开发策略研究，并辅之以法规政策、社会层面的相关研究。
- 这些研究成果为政府、旅游企业和旅游服务人员充分了解残疾人的旅游需求与动机，制定针对性政策，合理有序地开发残疾人旅游市场奠定了坚实的理论基础。
